## **DETAILED ACTION**

### ***Specification***

The specification is objected to because of the following informalities:

- Cited patent reference 2, JP 39-8140 (see page 2, lines 4-5), was not found in the JPO database.

### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description:  $f$  and  $\theta$ . Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

It is not clear what limitations are claimed since independent claim 1 recites, *inter alia*, "In an image pickup apparatus..., an image pickup apparatus is characterized in that...". There is no clear indication of the machine or manufacture being claimed.

In addition, claim 1, in lines 11-12 recites, "a cross-section passing said viewpoint center". The meaning of this phrase is unclear.

Furthermore, claim 1, in lines 18-21 recites, "a focal length which results from synthesizing the whole of lenses within said image pickup unit containing said front lens is assumed to be  $f$ ", which is unclear.

In addition, claims 1 and 2 recite the limitation "said *adjacent* image pickup units" (emphasis added) in lines 3 and 2, respectively. There is insufficient antecedent basis for this limitation in the claim.
